

Facilitating case discussion and treatment collaboration virtually

Challenge

Make disparate knowledge available to remote specialists, locally and globally

Solution

NAVIFY Tumor Board enables standardized, secure multidisciplinary team collaboration based on integrated patient data and the latest National Comprehensive Cancer Network Clinical Practice Guidelines in Oncology (NCCN Guidelines[®]), clinical trial options, and medical and scientific literature powered by MolecularMatch, Inc. Oncology care teams may prepare and discuss cases from anywhere, in synchronous or asynchronous sessions, to optimize personalized treatment decision-making.
